

Fire brigade cabinet IPF

The fire brigade cabinet IPF is designed for rescue services and fire brigades and can be equipped with adjustable feet.

It is a welded construction made of 1 mm thick sheet steel. They guarantee the immediate availability of emergency clothing whenever it is needed. The steel grids can be fitted with adjustable feet (height 100 mm). For an extra charge, the lockers can be equipped with a special flip-up helmet holder. By simply pulling on the helmet, the holder folds down, making it much easier to remove the helmet.

Feature Fire brigade cabinet IPF
