

## Fire brigade cupboard IPO

The IPA fire brigade locker is designed for rescue services and fire brigades. The wardrobe can be equipped with further details such as adjustable feet and tiltable helmet holders.

The special cupboards for fire and rescue services are an assembled construction made of 1 and 1.3 mm thick sheet steel. The cabinet is open so that clothing and equipment can be accessed immediately during an operation. The side walls are perforated so that the clothing can air out sufficiently. The steel shelves can be equipped with feet (height 100 mm) and levelling screws. With the special tiltable helmet holder it is possible to remove the helmet more easily.
