

## Fire brigade cupboard IPS

The IPA fire brigade locker is designed for rescue services and fire brigades. The wardrobe can be equipped with further details such as adjustable feet and tiltable helmet holders.

The special cabinets for fire brigades and rescue services are an assembled construction made of 1 and 1.3 mm thick sheet steel. The cabinet is open so that clothing and equipment can be accessed immediately during an operation. The side walls are perforated so that the clothing can air out sufficiently. The steel shelves can be equipped with feet (height 100 mm) and levelling screws. With the special tiltable helmet holder it is possible to remove the helmet more easily. This is an optional extra at extra cost. This locker system is designed for wall mounting and is delivered disassembled in packaging with dimensions 1800 x 350 x 550 mm.
